## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1,3,4,6,7,13,15,16,18,19, are rejected under 35 U.S.C. 102(b) as being anticipated by USP 6,381,802 (Park).

Figure 4 discloses an assembly which includes a base plate (11) which joins a bottom of a vacuum cleaner and includes one nozzle apertures, a vacuum cleaner skid plate (12) that fits to the plate (11) with screws (12a), and a trapped component (20a) including side brushes (20a, 20b). The skid plate (12) includes a plurality of apertures which align with the single nozzle aperture.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.

Art Unit: 1744

2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 5 and 17 are rejected under 35 U.S.C. 103(a) as being unpatentable over USP 6,381,802 (Park).

The Park patent is silent as to the material composition of the parts. However, it is considered to be within the kin of a routineer to fabricate the skid plate (12) using a metal such as light-weight aluminum.

Claims 1,2,4,6,13,14,16,17,18, are rejected under 35 U.S.C. 102(b) as being anticipated by WO 99/37198.

Figures 2 and 3 illustrate a vacuum cleaner base plate assembly (12) comprising a base plate (39) which fits to a chassis bottom (21) having one or more nozzles (35,37), a vacuum cleaner skid plate (30) which is fastened with screws and traps a pair of wipers (32,34).

Art Unit: 1744

Claims 5 and 17 are rejected under 35 U.S.C. 103(a) as being unpatentable over WO 99/37198.

The Park patent is silent as to the material composition of the parts. However, it is considered to be within the kin of a routineer to fabricate the skid plate (12) using a metal such as light-weight aluminum.

***Allowable Subject Matter***

Claims 8-12 are allowed.

As allowable subject matter has been indicated, applicant's reply must either comply with all formal requirements or specifically traverse each requirement not complied with. See 37 CFR 1.111(b) and MPEP § 707.07(a).
